

With Bendix, replacing ABS is as Easy as ABC

- A. Removal. Inspect the vehicle for damage, chafing, etc. to current ABS unit, hoses or wiring and adjust routing of replacement installation as necessary. Disconnect original harness from the wheel speed sensors, trailer power cord and warning lamp. Remove the current ABS unit and harness.
- B. Pneumatic Installation. Install the replacement ABS ECU and modulator assembly. Reconnect the supply air hose for the service brake, if not tank-mounted. Reconnect the control air hose to the control port of the modulator. Reconnect the delivery air hoses to the modulator and plug any unused ports.
- C. Electrical Installation. Reconnect the wheel speed sensor leads, the indicator light, the ECU to the trailer power harness. Attach identification label near the ABC indicator lamp (remove original label). Run system checks.

Footnotes for Competitive Part Numbers:

- ¹6-port valve
- ²2-port valve
- ³1/2 inch nipple
- ⁴Wabash style bracket required
- ⁵sensor blocks included in kits
- ⁶no sensor extension
- ⁷length of sensor extension varies
- ⁸trailer harness not included
- ⁹wheel sensors/clips included
- ¹⁰second ABS valve (2-port), solenoid cable (79")
